# Jalen Chance

## Media and Film Production

As a student at the University of Florida I had the opportunity to specialize my skill in media and film production both inside and outside the class room. I have expert experience in production including: camera operation, boom operation, production assistance, editing, screen writing, direction, key grip, acting, producing and lighting. Here is a link to my work. Now as an employee at WJXT I also have gained experience in technical directing, producing, and editing.
