🎯 Objective

I seek a job where I can write, direct, and show my perspective on film, formed by my love for comedy, the surreal, exploration of the human condition, and comparing forms of art. I believe communication between cast/crew is key and focus on writing, directing, editing, and occasionally storyboarding.

👤 Profile

My name is Kai, I grew up loving all forms of visual media and arts, so in my last year of high school decided to go the way of the director. I attended UCF for my Film BA and became acquainted with film production, screenwriting, direction, sound design, cinematography, the foundations of story-telling and a better appreciation of the arts.

👤 Skills

Throughout my various fields of employment, I’ve learned how to better communicate with others, time management, improvising and collaboration of ideas, and organization in regards improving my clerical work ethic. This along with a YouTube channel I make videos with for fun on, have helped me with my artistic/narrative vision.
